# Weather Key Points

Regional Operations Center

Western Region

Wednesday, September 14

- Isolated showers and thunderstorms will linger over mainly the Sierra and far southeast mountains and deserts through Wednesday, but with significantly less coverage and fewer impacts than the past few days
  - A few storms could produce locally heavy rainfall along the Nevada border
  - Isolated burn scar impacts possible near areas of heavier rainfall.
- Fire weather conditions will remain elevated across much of northern California through midweek, with elevated conditions expanding back into much of southern California for mid and late week as breezy conditions return for the mountains and foothills
  - The strongest winds are expected through Wednesday, with gusts up to 35 mph possible, mainly over the Sierra, Modoc Plateau, and coastal ranges of northern California
- A cooler pattern with a chance of showers and thunderstorms could set up across the northern half of the state over the weekend and into Monday
  - While no widespread heavy rain is expected, isolated burn scar impacts are possible near areas of heavier rainfall.
  - Snow is possible over the higher elevations late Sunday into early Monday, though no significant accumulations are expected at this time.
